PROFESSIONAL SUMMARY

Full-Stack Developer focused on TypeScript, Next.js and PostgreSQL. Over a year building and shipping production web applications for small businesses, including payments, role-based access control and end-to-end testing. Comfortable working in English, Portuguese and Spanish. Seeking a remote junior/mid-level full-stack role.

PROFESSIONAL EXPERIENCE

Freelance Remote, Argentina
Full-Stack Developer *2025 – Present*

- Built and maintain **Pixel Point** (pixel-point.com.ar), a production e-commerce platform for an electronics retailer, using Next.js, TypeScript, Prisma and PostgreSQL: customer accounts, cart, favorites and an admin panel for products, orders and stock.
- Integrated Mercado Pago payments with HMAC-SHA256-verified webhooks (constant-time comparison) and idempotent order processing, preventing duplicate stock deductions and stopping out-of-order notifications from reverting paid orders.
- Designed the data model across 19 Prisma migrations (including a MySQL-to-PostgreSQL move) and implemented role-based access control and email verification with NextAuth v5.
- Wrote Playwright end-to-end tests covering sign-in, registration and checkout against the Mercado Pago sandbox, run in GitHub Actions on every push and pull request.
- Delivered a catalog and inquiry platform for **Armería Sport Shooting** (armeriasportshooting.com.ar) with Next.js, Prisma, PostgreSQL and Auth.js: stock and product condition, a WhatsApp-based inquiry flow and an admin panel for inquiries, reservations and sales.

Social Learning Remote, Argentina
Frontend Developer (Internship) *July 2024 – December 2024*

- Built and documented a reusable component library with Vue 3 and Tailwind CSS to keep the UI consistent and speed up delivery across the platform.
- Implemented client-side filtering for large product catalogs.
- Implemented route protection and secure session persistence for the private areas of an e-commerce platform.
- Applied WCAG accessibility guidelines and responsive design practices.
- Worked in an Agile team, using Git/GitHub for version control and Jira for task tracking and bug resolution.

PROJECTS

Esportify *2026 – In development*
Tauri v2, Rust, Next.js, TypeScript, Hono, PostgreSQL, Redis
Voice-first desktop app for gamers, built with a collaborator. Authored 369 of 574 commits: end-to-end encryption (MLS), the Rust/Tauri layer, a UDP voice relay with HMAC-signed join tokens, and most of the desktop client.

Restaurant Reservations SaaS *2026*
Next.js, TypeScript, Auth.js, Drizzle, PostgreSQL, Redis, Vitest
Multi-role booking system with a public booking page, guest portal and staff dashboard. Authorization enforced server-side on every action, fail-closed rate limiting, and verification codes with expiry, cooldown and lockout.

rbac-permissions-example *github.com/Kev-Villegas/rbac-permissions-example*
TypeScript, Vitest
Tested, zero-dependency TypeScript library implementing permission bitfields, channel overwrites and a role hierarchy.

EDUCATION

TECLAB Higher Technical Institute Córdoba, Argentina
Higher Technician in Programming *December 2024*

SKILLS

Languages: TypeScript, JavaScript, SQL, Rust (Tauri)
Frontend: React, Next.js (App Router), Vue 3, Tailwind CSS, Framer Motion
Backend & Data: Node.js, REST APIs, Hono, Prisma, Drizzle, PostgreSQL, Redis, Supabase, Auth.js / NextAuth, Zod
Testing & Tools: Playwright, Vitest, GitHub Actions, Git, Postman, Jira
Learning: Docker, AWS

LANGUAGES

English (C1) • Portuguese (C1) • Spanish (native)
